

# Loctite® Resin Polymerization Tester

Technologically advanced testing for  
the impregnation industry

- Eliminate subjective data – increase efficiency by reducing operator error.
- Ensures resin is curing properly to maintain quality at all times.
- Enhance throughput of quality parts.
- Unattended operation. Automatic test cycle eliminates monitoring and the risks of operator error.
- Information can be downloaded and stored for easy access and analysis.

Nobody can match Loctite porosity sealing resin technology.
